PAKISTAN INDUSTRIAL, ENERGY & LOGISTICS REGISTRY

An advanced operational matrix covering heavy economic zones, regional gas infrastructure, and special economic zones.

1. China-Pakistan Economic Corridor (CPEC) Special Economic Zones (SEZs)

Zone / Location	Target Industries / Sector Focus	Strategic Infrastructure & Utilities
Rashakai SEZ (Nowshera, KP)	High-tech, textile processing, mechanical equipment, household appliances, and pharmaceuticals.	Access to the M-1 Motorway, dedicated 132 KV grid station, and gas pipelines tailored for heavy industrial consumption.
Allama Iqbal Industrial City (AIIC) (Faisalabad, Punjab)	Textiles, engineering, electronics, chemicals, food processing, and construction materials.	Adjacent to M-4 Motorway, spanning over 3,217 acres. Integrated one-window service center for investors.
Dhabeji SEZ (Thatta, Sindh)	Steel foundries, automotive assembly, petrochemical units, and heavy engineering.	Direct maritime connectivity via Port Qasim (50 km away) and dedicated access links to the National Highway.
Bostan SEZ (Pishin, Balochistan)	Fruit processing, cold storage infrastructure, agricultural machinery, and halal food industries.	Positioned near Quetta, linking crucial trade routes toward Afghanistan and Central Asian Republics via Chaman.

2. Midstream Natural Gas Pipelines & LNG Regasification Infrastructure

Asset / System	Operator / Footprint	Technical Capabilities & Throughput
SNGPL Transmission Network	Sui Northern Gas Pipelines Limited (Serves Punjab, KP, and Islamabad)	Extensive high-pressure loop lines carrying gas from southern injection points to northern heavy load centers.
SSGC Transmission Network	Sui Southern Gas Company (Serves Sindh and Balochistan)	Manages the critical coastal receipt infrastructure and links domestic onshore fields like Sui and Bhit to the grid.
Engro Elengy Terminal (EETL)	Port Qasim, Karachi	Floating Storage and Regasification Unit (FSRU) with a peak capacity of 600 mmcfd, handling LNG imports.
Gasport LNG Terminal	Port Qasim, Karachi	Second operational LNG terminal providing regasification services up to 600 mmcfd to alleviate winter gas deficits.

3. Heavy Smelting, Mining & Mineral Extractions

Resource Complex	Geographic Node	Industrial Function & Strategic Output
Saindak Copper-Gold Project	Chagai District, Balochistan	Blister copper extraction plant equipped with open-pit mining operations and an on-site thermal power unit.
Thar Coal Block II & VI	Thar Desert, Sindh	Massive lignite coal extraction fueling mine-mouth power plants under CPEC to substitute expensive fuel oil imports.
Tuwairqi Steel Mills (TSML)	Port Qasim Corridor	Pakistan's first private-sector Direct Reduced Iron (DRI) plant designed for high-grade steel manufacturing.
